RESTRICTION INTO GROUPS

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a method of enhancing binding of a compound as set forth in independent claim 1, classified in class 424, subclass 1.11+.
 - II. Claims 11-17, drawn to a target binding composition comprising a lamellar containing conjugate as set forth in independent claim 11, classified in class 424, subclass 1.73+.
 - III. Claims 18-28, drawn to a method of enhancing the affinity of binding compounds as set forth in independent claim 18, classified in class 424, subclass 9.2.
 - IV. Claims 29-47, drawn to a method of performing a diagnostic or therapeutic procedure as set forth in independent claim 29, classified in class 424, subclass 9.1.

2. The inventions are distinct, each from the other because of the following reasons: Inventions (II and I), (II and III) and (II and IV) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product may be used in various processes such as (a) enhancing the affinity of binding to compounds as set forth in independent claim 18; (b) enhancing binding of a binding

compound to a target site as set forth in independent claim 1; or (s) performing a diagnostic or therapeutic procedure on a patient as set forth in independent claim 29.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

ELECTION OF SPECIES

4. Claims 1-47 are generic to a plurality of disclosed patentably distinct species comprising multicomponent conjugate assemblies. The assemblies may comprise various linkers (e.g., see claim 27), targets (e.g., see claim 19), A1 and A2 components (e.g., see claim 25), B1 and B2 components (e.g., see claim 31, and or diagnostic or therapeutic metals (e.g., see claim 40). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Note: *The Examiner respectfully requests that Applicant a single discloses species for search purposes from within the elected group. Applicant is requested to identify all of the components of the multicomponent conjugate (e.g, A1 = CF₃(CH₂)_a; a = 16; B1 =glucose; etc.). In addition, Applicant is requested to identify which claims are directed to the elected species.*

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was not made to request an oral election to the above restriction requirement due to the complexity of the restriction requirement.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (703) 308-4640. The examiner can normally be reached on Mon.-Fri., 6:45 a.m. - 3:15 p.m..
